

H E N K I N G C H E S S !

Sponsored by the Henking/Hoffman PTA

Monday & Tuesday Mornings: 8-8:50 AM, Fridays After School: 3:30-4:30 PM

Mr. Bruce Haffner, our instructor for the last five years, is back at Henking for another fun filled season of school chess! Learn pins, forks, double attacks and checkmating moves!
Learn bughouse (team chess) and play for trophies in the school championship!

Psychologist Howard Gardner says spatial intelligence is one of the eight intelligences children need to develop because it is the basis for creativity. Howard says "The ability to anticipate (chess) moves and their consequences seems closely tied to strong imagery" and that good chess players have good spatial intelligence. Mr. Haffner's goal is to communicate to your child the concept of "owning their education". Children benefit in many ways when they go beyond what they learn in school: they need to become an expert in something they find interesting. Chess helps map your child's brain for math and science by teaching how to break problems down into steps and put together combinations that solve puzzles and win games. Join us this Winter!!
